

FLATHEAD E-WASTE RECYCLING LLC

Capability Statement

COMPANY OVERVIEW

Flathead E-Waste Recycling provides lithium battery and electronic waste collection, handling, and logistics services across Kalispell, the Flathead Valley, and surrounding rural Montana communities. We focus on building local infrastructure to safely divert hazardous materials from landfills while reducing costs and logistical burdens for businesses and institutions.

CORE CAPABILITIES

- Lithium-ion battery collection and recycling
 - Electronic waste (e-waste) recycling
 - Business, healthcare, and retail pickup services
 - Safe handling and transport of regulated battery materials
 - Rural collection route development and logistics
 - Material tracking, weighing, and documentation
-

DIFFERENTIATORS

- **Local Operator:** Based in Kalispell serving rural Montana
 - **Specialized Focus:** Lithium battery & e-waste streams
 - **Logistics Driven:** Efficient pickup and consolidation model
 - **Established Relationships:** Healthcare and retail sector traction
 - **Scalable Infrastructure:** Designed for growth across rural regions
-

CURRENT & DEVELOPING RELATIONSHIPS

- Logan Health – battery recycling and materials handling
- Regional retail partners – battery collection programs (in development)
- Local businesses – electronics and battery recycling services

IMPACT

- Diverts hazardous materials from landfills
 - Expands rural access to recycling infrastructure
 - Reduces long-distance transport of regulated waste
 - Supports environmental compliance for organizations
-
